Permit B (EU citizen)

Computer Engineer graduate based in Zürich, currently finishing an MSc in Data Science. I'm a curious person who loves learning how things work and turning that curiosity into useful solutions. I am always eager to learn something new and always up for a new challenge.

EDUCATION

MSc in Data Science & Big Data

International University of Valencia (VIU)

Valencia, Spain

Apr 2026 – Actual

BSc in Computer Engineering (Networks & Systems track)

Pontifical University of Salamanca (UPSA)

Salamanca, Spain

Sep 2020 – Aug 2024

BSc in Computer Engineering and Digital Business Engineering

Anahuac Mayab University (Exchange)

Merida, Mexico

Aug 2022 – May 2023

WORK EXPERIENCE

AI & Automation Consultant (Self-employed)

Freelance project

Leon, Spain

Apr 2025 – Aug 2025

- Founded and ran a one-person AI automation business, owning everything from admin and client acquisition to development, deployment and support.
- Built AI customer service assistants for 5+ local businesses, automating inquiries, bookings and inventory.
- Cut manual booking workload by ~20% with n8n workflows and REST API integrations.
- Hardened prompt logic and built custom data storage functions for each business case.

Data Analyst

Deloitte

Madrid, Spain

Oct 2024 – Mar 2025

- Delivered data analysis and KPI tracking for 3+ consumer-sector clients, supporting sales growth and decision-making.
- Identified customer behaviour trends that informed commercial recommendations.
- Co-developed an internal AI solution with a cross-functional team, prototyped and deployed to production.
- Worked in Agile teams under tight deadlines, joining planning sessions and client-facing meetings and delivering on time by prioritizing tasks.

Computer Technician (intern)

Metech

Madrid, Spain

Jul 2023 – Sep 2023 & Mar 2024 – May 2024

- Contributed to multiple startup projects using Git version control best practices.
- Built an Arduino-based microstepper controller later integrated into an industrial printer.
- Created a web-based data visualization project with interactive dashboards for analysis.

PROJECTS

Forecasting Zurich's NO₂ Pollution with SARIMA

MSc assignment

R, RStudio, forecast, tseries, dplyr, lubridate, ggplot2

Sep 2026

Developed a SARIMA forecasting model for monthly NO₂ in Zürich using 16 years of open data, validated at a 3.95% test error.

Airport Traffic Clustering (EUROCONTROL)

MSc assignment

Python, K-means, Pandas, Data cleaning

Jun 2026

Applied KDD/CRISP-DM methodology and K-means clustering to profile European airport traffic patterns from EUROCONTROL data.

MongoDB Health Data Pipeline

MSc assignment

Python, MongoDB Atlas, MongoDB Charts, Google Colab

May 2026

Built an end-to-end pipeline combining Valencian health data and Swiss housing data, visualized through 5 analytical charts.

Multimedia Metadata Extraction Tool

Bachelor's thesis

Swift, AVFoundation, ImageIO

Jun 2024

Built a Swift command-line tool to extract metadata from 10+ multimedia formats, with forensic and copyright-detection use cases.

SKILLS

Data & Analytics

- Python
- SQL
- PowerBI
- BigQuery
- MongoDB
- Snowflake
- Cassandra
- PySpark
- Hadoop
- Data pipelines

Engineering & Dev

- JavaScript
- HTML/ CSS
- C/ C++
- Arduino
- GitHub

Platforms & Tools

- n8n
- REST APIs
- Google Workspace
- Excel
- PowerPoint

LANGUAGES

- **Spanish** – Native
- **English** – Fluent
- **German** – Beginner
- **French** – Beginner
