Computer Engineering graduate with professional experience in data analysis and AI-driven automation at Deloitte and as an independent consultant. Currently completing an MSc in Data Science while based in Zürich (Permit B). Seeking data analyst, data engineer, or data science roles.

WORK EXPERIENCE

AI & Automation Consultant (Self-employed)

Leon, Spain

Freelance project

Apr 2025 – Aug 2025

- Built and deployed AI-powered customer service assistants for 5+ local businesses, handling client inquiries and automating booking and inventory management tasks.
- Reduced manual booking workload by ~20% through n8n workflow automation and REST API integrations.
- Improved solution reliability by hardening prompt logic and designing custom data storage functions tailored to each business case.
- Advised clients on digital transformation strategy, identifying automation opportunities and translating them into deployable technical solutions.
- Managed full project lifecycle end-to-end, from requirements gathering and solution design to deployment and client handover.

Tech stack: REST APIs, Webhooks, n8n, Vapi, Excel, Google Workspace

Data Analyst

Madrid, Spain

Deloitte

Oct 2024 – Mar 2025

- Delivered data analysis and KPI tracking for 3+ corporate clients in the consumer sector, supporting sales growth initiatives and data-driven decision-making.
- Identified recurring trends in customer behaviour data, contributing to strategic recommendations that informed commercial decisions.
- Contributed to an internal AI initiative, collaborating with a cross-functional team to design and prototype a solution deployed in a production environment.
- Worked within structured Agile workflows across multidisciplinary teams, actively participating in planning sessions and client-facing meetings.

Tech stack: Python, SQL, PowerPoint, Excel, Word, Power BI

Computer Technician (intern)

Madrid, Spain

Metech

Jul 2023 – Sep 2023 & Mar 2024 – May 2024

- Participated in multiple projects for a startup, working under company guidance and following best practices in version control to ensure code integrity and project organization.
- Developed a project using Arduino to control microsteppers, which were later integrated into an industrial printer, gaining hands-on experience with embedded systems and hardware programming.
- Created a data visualization web project, implementing formulas and interactive dashboards to display and analyze information effectively for decision-making purposes.

Tech stack: C/C++ (Arduino), JavaScript, HTML/CSS, GitHub (version control), Tableau

EDUCATION

MSc in Data Science

International University of Valencia

Valencia, Spain

Apr 2026 – Present

BSc in Computer Engineering

Pontifical University of Salamanca

Salamanca, Spain

Sep 2020 – Aug 2024

BSc in Computer Engineering and Digital Business Engineering

Anahuac Mayab University (Exchange)

Merida, Mexico

Aug 2022 – May 2023

PROJECTS

<https://jasarmis.github.io/>

Airport Traffic Clustering (EUROCONTROL)

Python, K-means, Pandas, Data cleaning

MSc assignment

Jun 2026

Applied KDD/CRISP-DM methodology and K-means clustering to profile European airport traffic patterns from EUROCONTROL data.

MongoDB Health Data Pipeline

Python, MongoDB Atlas, MongoDB Charts, Google Colab

MSc assignment

May 2026

Built an end-to-end pipeline combining Valencian health data and Swiss housing data, visualized through 5 analytical charts.

Multimedia Metadata Extraction Tool

Swift, AVFoundation, ImageIO

Bachelor's thesis

Jun 2024

Built a Swift command-line tool to extract metadata from 10+ multimedia formats, with forensic and copyright-detection use cases.

SKILLS

Data & Analytics

- Python
- SQL
- PowerBI
- BigQuery
- MongoDB
- Snowflake
- Cassandra
- PySpark
- Hadoop
- Data pipelines

Engineering & Dev

- JavaScript
- HTML/ CSS
- C/ C++
- Arduino
- GitHub

Platforms & Tools

- n8n
- REST APIs
- Google Workspace
- Excel

LANGUAGES

- **Spanish** – Native
- **English** – Fluent
- **German** – Beginner
- **French** – Beginner
